LIVE GOATS · LIVE ANIMALS

Murciano-Granadina dairy goats

Product page
www.europeangulf.com/en/products/live-goats/murciano-granadina-goats/

The Murciano-Granadina is a hardy, medium-sized dairy breed, black or mahogany, known for rich milk with high fat and protein – ideal for cheese and dairy products. It tolerates heat very well, adapts to grazing and semi-intensive systems and has good fertility, which makes it a strong choice for hot climates. We select does and bucks on selected farms to your specification and arrange testing, certificates and transport.

Specifications

Category	Live goats
Presentation	Live animals
Condition	Live animals
Origin	Confirmed per order
Breed	Murciano-Granadina – dairy breed
Appearance	Black or mahogany, short fine coat, usually hornless; well-attached, capacious udder
Size (adult does, indicative)	Medium breed – does about 40–55 kg
Milk yield (indicative)	Commonly about 500–700 litres per lactation; higher in intensive herds
Milk composition (indicative)	Rich milk: about 5–5.6 % fat and 3.5 % protein – excellent cheese yield
Climate & management	Very heat-tolerant and hardy; suits grazing, semi-intensive and intensive systems

Supply	Young does, pregnant does and breeding bucks; age, number of heads and pregnancy stage agreed per request
Health & certificates	Veterinary tests, vaccinations, quarantine and export health certificate according to the destination's requirements
Delivery	Live animals are traded separately from meat. Veterinary, transport and welfare requirements are checked for each destination.

Frequently asked questions

Saanen or Murciano-Granadina – which should I choose?
Saanen gives more litres in well-equipped, cooled housing; Murciano-Granadina gives richer milk, copes better with heat and grazing, and suits cheese production. Tell us your climate and system and we advise.
